Measurements may vary +/- 5% from actual product  
Measurements are presented in inches

### EMBROIDERY

Embroidery is sewing a design, type or logo onto a garment with special thread. It gives garments a higher perceived value and works very well on fleece and heavier weight garments.

### FOIL PRINTING

It combines heat and pressure to transfer foil to a garment. Foils come in many colors and patterns, and create dramatic accents or overall designs on all fabric colors and weights.

### SCREEN PRINT

A technique that uses stencils and ink to create designs on garments. It is the most economical method for producing large quantities that involve cotton or cotton-blend garments.

### SUBLIMATION

This process utilizes heat-sensitive inks to create long-lasting, full-color, photo-quality reproductions of digital images. Sublimation is well suited for 100% polyester garments.

### PUFF PRINT LETTERING

A method for creating a 3D design by screen printing with an ink containing a unique foaming agent or puff additive that expands when heated. Ideal for simple designs.

### GLITTER PRINTING

A special clear glitter topcoat is screen printed on top of the colored design to add shine and impact to your design. This technique can work on all colors and weights of fabrics.

### DISTRESSED AND CLEAR INK

Distressed printing gives screen prints an intentionally weathered look. Clear inks can be used to add a glossy shine or dimension to a design.

### NEON COLORS

Using this two-step screen printing process helps you achieve the brightest possible color on a garment. It works by printing transparent neon inks on top of a white opaque base.
